CHAIN LINK FENCE

A chain-link fence (also referred to as wire netting, wire-mesh fence, chain-wire fence, cyclone fence, hurricane fence, or diamond-mesh fence) is a type of woven fence usually made from galvanized or LLDPE-coated steel wire.

All commodities are galvanised or pvc coated as per standard and powder Coated. We have well experienced Fence fabricators and installation team to implement the work at any conditions.

CORRUGATED HOARDING FENCE

Temporary fencing is a free standing, self-supporting GI fence panel, the panels are held together with couplers that interlock panels together making it portable and flexible for a wide range of applications. A common type of temporary fencing is Heras fencing.

WELDED WIRE MESH / HERAS FENCE

Welded wire mesh fence is a steel fence consisting of wire strands electrically welded together to form a high strength mesh. The fencing is available in two formats: Rolled mesh and Rigid mesh.

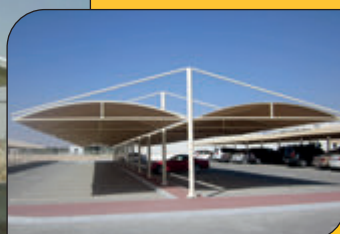

CONTINUOUS FENCE SYSTEM

Continuous fencing is a free standing, self-supporting fence panel, the panels are held together with couplers that interlock panels together making it portable and flexible for a wide range of applications.

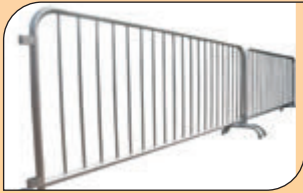

GATES

Temporary and permanent Fence gates are prepared using either galvanised GI sheets and pipes or welded wire mesh. Gates are fixing proper foundation and supports.

CAR PARKING SHED

Car parking shed is a covered structure, which is offering a good ventilation. Shed was fabricated using GI galvanized pipes and high quality roof covering cloths.

BARRICADES

Barricades are used for crowd control applications at public events or during exceptionally busy shopping times. Different types of barricade are designed to fit the environment and use cases the organizer decides on.

BOLLARDS

A bollard is a short post used to create a protective or architectural perimeter. When installed primarily as a visual guide, they guide traffic and mark boundaries. ... Bollards can also be constructed to physically block vehicle incursion, protecting people and property.

LADDERS

A ladder is a vertical or inclined set of rungs or steps. Rigid ladders are usually portable, but some types are permanently fixed to a structure, building, or equipment. They are commonly made of metal.

BIRDS SPIKES

Bird Spikes can be used to control a wide variety of architectural bird problems caused by Pigeons and Seagulls. A professional range is available in either narrow, medium or wide manufactured from stainless steel or a budget range manufactured from polycarbonate. The range of spikes mean you can use different sizes in conjunction with each other to ensure you have the whole ledge protected. Used for protecting ledges, gutters, beams, pipes, signs etc

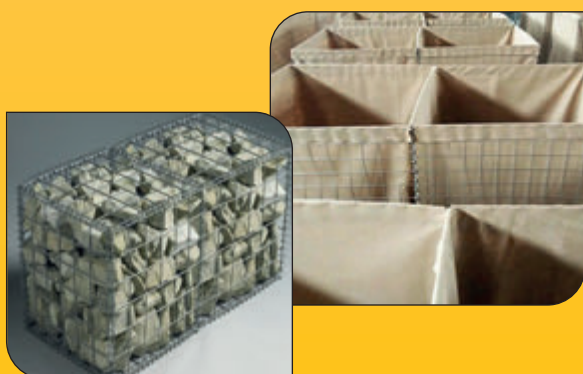

GARBAGE CHUTES

A garbage chute is a passage, esp common in high-rise apartment buildings, through which refuse is carried by means of gravity to a large waste receptacle at the bottom end.

- Stainless Steel: SFSP strongly recommends the use of stainless steel for the manufacture of refuse chutes. Stainless is highly resistant to the humidity, acid and alkalis contained within refuse.

PORTA CABINS

Smaller version of portable buildings is also known as portable cabins. Portable cabins are custom built prefabricated structures manufactured for variety of applications such as site office, security cabin, accommodation, storage, toilets etc.

GABION BOX & HESCO BARRIERS

A gabion is a cage, cylinder or box filled with rocks, concrete, or sometimes sand and soil for use in fencing, road building, boundary wall making, military applications and landscaping. gabion is a partially flexible block construction used for slope stability and erosion protection in construction.

HESCO security barriers are engineered to provide a rapidly deployed high-level security fence for the protection of critical infrastructure and assets. Combining the central concept of the Concertainer system, these fences are ground-mounted and proven to withstand vehicle borne attacks. HESCO Accommodation Bunkers (HAB) are specially engineered shelters for personal protection, command stations to in-field medical centres, and overhead protection for ammunition stores.

DECORATIVE – RTA FENCE

RTA decorative fence is GI corrugated fence and all materials should be galvanized as per standard and powder coated.

GUARD RAIL

Guard rail, guardrails, or protective guarding, in general, are a boundary feature and may be a means to prevent or deter access to dangerous or off-limits areas while allowing light and visibility in a greater way than a fence. Guardrails also apply in a technology context.

ECOLOGICAL FENCE (PVC COATED)

This is ECO Friendly Decorative PVC coated Welded Wire Mesh Fence. A synthetic fence, plastic fence or (when made of vinyl) vinyl or PVC fence is a fence made using synthetic plastics, such as vinyl (PVC), polypropylene, nylon, polythene (polyethylene) ASA, or from various recycled plastics. Composites of two or more plastics can also be used to increase strength and UV stability of a fence.

QUEUE BARRIERS AND STANCHIONS

Queue barriers allow you to control the flow of walking traffic in a particular area. They can help form orderly queuing lines in retail and event environments. Or queue barriers can help create enclosed spaces to form VIP floor space.

We supply good quality product, different variants with affordable prices.

TRAFFIC CONES AND BARRIERS

Traffic cones, also called pylons, road cones, highway cones, safety cones, channelizing devices, construction cones, or just cones, are usually cone-shaped markers that are placed on roads or footpaths to temporarily redirect traffic in a safe manner. They are often used to create separation or merge lanes during road construction projects or automobile accidents.

The reflective sleeves are for night-time visibility. It is easy to handle and can be used for attaching caution tape.

PRECAST CONCRETE BLOCKS

There are many different types of precast concrete forming systems for architectural applications, differing in size, function, and cost. Precast concrete blocks are used for fixing different types of fences (steel corrugated fencing, chain-link fence, pvc fencing etc), landscaping and security walls.
